

## Hand Held Brake Pipe Flaring Tool

### Information

---

- The fastest and most convenient way to create double or single flares on brake lines.
- Can be used on a variety of materials including copper, nickel, and stainless steel.
- The ability to work in situ with the vehicle saves huge amounts of time and effort.

### Precautions

---

Always wear safety gear.  
Working in a clean and safe environment.  
This task should be carried out by trained personnel.  
Make sure to consult manufacturers manual.  
Do NOT use with air tools.

## Instructions

- Keep the pipe end flat against centre line.
- Tighten the locking screws fully to clamp the pipe.

### Step 1

- Insert the OP1.
- Punch (I.D. groove) and tighten fully up to hexagon.

### Step 2

- Remove the punch.
- Rotate and insert the OP2 end punch.
- Tighten fully up to a hexagon.

## Warranty

If you are unsure on how to use the item please contact us. If it were to fail due to a manufacturing fault or poor workmanship we will repair or replace it. Please contact your local dealer in the event you need to send the item back. You can also make a repair/replacement request on our website and download & complete the form online. Normal wear and tear along with misuse will void any warranty. Consumables are not covered under warranty.
